

When you're washing your car
in the driveway,
remember you're not *just* washing it in the driveway...

Rain washes soap, dirt, and oil into storm drains, which lead straight to our streams, Humboldt Bay, and the ocean.

SOAP IS FOR DISHES, NOT FOR FISHES!

Chemicals in soap are toxic to fish and other aquatic life, and cause an overgrowth of algae that makes people, pets, and wildlife sick.

Wash your car at the car wash, or on gravel or grass. Use less soap, and pour the bucket of soapy water into your sink—not on the driveway!
